

Prince of Wales

Behavioral Health System Planning Project

The Prince of Wales (POW) Health Network has received a grant from the State of Alaska, Department of Prevention + Intervention to work through a behavioral health planning process.

The goal of the project is to: 1) understand the behavioral health needs of POW communities; 2) to increase local capacity to respond to these needs; 3) and to develop a plan that includes strategies for improving behavioral health and prevention services on POW.

WE NEED TO HEAR FROM YOU!

The POW Health Network wants to document the priority issues concerning behavioral health on Prince of Wales Island. With the insights of community members instructing the planning process, we can increase the local ability to serve residents who are in need of behavioral health support.

VISIT THE WEBSITE

Please visit the project website to complete a questionnaire to add your voice to this process. Two questionnaires are available, one for service providers and the other for community members:
